STONY PLAIN SPORTS DAY,

MONDAY, JULY FIRST.

All Kinds Sports. Dance in Evg.

Sports Day Notes.

The contest for the basketball prizes should be interesting, as the entrants have been limited to those teams in the local league: Stony Plain, W.L. Central, Brightbank, Comet. Mr. Meyer, who was to have charge of the basketball arrangements, has been incapacitated thru ill-health, but will probably be able to attend the games on Monday.

The dance and band committee have been successful in engaging that well-known musical organization Adam Appel's band, from Golden Spika.

This dance committee are having the hall decorated specially for this event, and with the popular orchestra Barth's disposing the music, this dance will be a very fitting close to Dominion Day celebration.

Marshall—Collicutt.

A quiet wedding took place on Tuesday, June 18, at the home of Mr and Mrs H. Collicutt, Edmonton, when their only daughter, Eva Mae became the bride of Clifford H. Marshall of Foothills. The bride, entering the drawing room on the arm of her father, was charming in a gown of white lace. She carried a shower bouquet of roses and wore a wreath of lily-of-the-valley in her hair. Mendelssohn's Wedding March was played by Viola McGowan, niece of the bride. The wedding supper was served at the Corona, at which over three score guests were present. Rev. C. G. Stone, pastor of the First Baptist church, proposed the toast to the bride.

The many gifts received tell of the popularity of the bride in Edmonton and in Stony Plain, where she had been on the teaching staff for several years.

A number of the bride's friends from Stony Plain were present at the ceremony.

Rifle Club's Doings.

The shooters of S. P. Rifle club meet at the Comet Buick Saturday next, the 29th. This is the 2d official shoot for June, with 2 more to come, in the month of July. Those who qualify in these four events are eligible to enter for the Provincial events at a later date in Calgary. The Stony club has quite an enlarged membership at the present time, as, since the closing down of the rifle range of the Edmonton rifle club, most of that club's members have joined up with the local club, including the members of the RCMP. The members of the latter Police force are not now so much in evidence at the Stony club's latest shooting contests, owing to the fact that all the spare policemen at the Capital have been sent to Regina, where trouble was feared when strikers from Vancouver bound for Ottawa were held up at Regina.

The 2 members of the local club who seem to be leading in the scoring are Col. Bown and Otto Hoffman.

Look Ahead And Prepare

Conditions in Western Canada, considering the whole area of the prairie provinces, present a changed picture this year to that of several years past, and the change is almost entirely due to the Weatherman. With the exception of comparatively small tracts, the great grain producing area of southern Saskatchewan which in recent years has suffered a lack of moisture has been favored with copious falls of rain, and Nature has thus largely solved a problem which all Governments and individuals, despite the expenditure of tens of millions of dollars, could barely cope with and certainly could not solve.

At the time of writing—which is ten days or so before this will appear in print—prospects are not only favorable for a normal, possibly an above normal, crop, but the big problem of feed and fodder for livestock seems solved as the soil is again saturated with moisture, sloughs and creeks filled with water, and grass again covers the ground. Admittedly it is too early yet to assume that present favorable conditions will not suffer some setbacks, and it would be a mistake to take too much for granted in a country where conditions change so quickly. At the moment, however, prospects are bright, and the foundation laid by May and June rains is such as to make a decided improvement almost a certainty.

Confidence in the country is being restored and hope is returning to many who had nearly abandoned hope and were on the verge of giving way to despair. Nature has thus provided an object lesson of how puny is man, notwithstanding his really marvellous achievements, when it comes to what are, after all, the deciding factors in the prosperity of any people or country. Man may plan, and should plan within those spheres where the decision and the control rests in his own hands, but all his planning will fail if it is not in conformity with natural laws, and takes into account what we erroneously term the vagaries of Nature.

With the experience of the past four or five years of drought, dust storms, almost complete absence of feed and fodder, seed for a new season's sowing, and an absence of reserves accumulated in good years to tide over the poor years which always come sooner or later, what is going to be the attitude of people in this and, it is to be hoped, even expected, future better years? In those districts where there is now an abundance of moisture will the lessons of the past be remembered and steps proceeded with to conserve the surplus wherever possible and feasible? Or will people quickly forget and again live only in the present without taking thought for the future?

If Western Canada is blessed with a bountiful crop, plenty of hay and grasses, large quantities of wild fruits, vegetables, etc., will people, profiting by the past, begin at once the building up of reserves against a future day when Nature may not be quite so generous in the bestowal of gifts? As Western people now look over their green and promising fields, are they planning, if the promise of those fields is fulfilled in the harvest, to conserve a little something as much as they possibly can, as an insurance for the future? Or will they quickly forget and dispose of their last resource, trusting to the future to again take care of itself?

It is no particular criticism of any person, or class of persons in this country to say that, in many respects, we have been a wasteful people, and have not realized that frugality which would have been the part of wisdom. Practically speaking all of us have been more or less wasteful. We have employed our resources in satisfying the desires, the ambitions, the pleasures of the moment, without giving sufficient thought to the future. In above-normal prosperous years, instead of providing some reserve in a more or less liquid form to meet future needs, we have dissipated them, or locked them up in some concrete way, or used them to expand our operations beyond what was necessary or wise. Thus seeming assets have been found to be heavy liabilities.

All have made this mistake—farmers, merchants, industrialists, financiers, municipalities, provinces, and the Dominion as a whole. Nobody can well point an accusing finger at any other person. But if we are wise, if we are capable of learning anything from past experience, surely we will now as a people, individually and collectively, recognize our past mistakes and not merely resolve not to repeat them, but proceed now to follow a different course, and, like Joseph of old, in the years of plenty put by to carry us and our country through years of scarcity.

Some people in the last year or two became almost convinced that drought and dust storms and crop failures had become a permanent condition. Those of riper experience knew better. They knew that the world has always experienced periods of plenty and periods of scarcity; that this is one of Nature's ways of maintaining a medium, a safe balance. There is reason to hope that the recent period of drought and scarcity has passed, and that a more fruitful period is at hand. But other periods of drought and crop failures will inevitably come; now is the time to prepare for them by becoming surety no person who has suffered through lack of the necessities of life in this recent period desires to pass through the same experience again.

Now is the time to take new heart, but it is also a time to think and act coolly, to keep sane, to take thought of and prepare for the future and insure oneself to the fullest extent possible against whatever misfortunes or setbacks may lie ahead.

Matter Is Settled

Science Service Estimates Superior Is World's Largest Lake

A year or so ago the News-Chronicle entered into a discussion of the comparative sizes of Lake Superior and Lake Victoria Nyanza in Africa. Someone, including some school teachers, advising their pupils, had declared the African lake to be larger.

Using all the information it could obtain from atlases and encyclopedias, this paper proved, to its own satisfaction at least, that Superior was the larger and thus the largest lake in the world. This was definitely in depth were considered, for it appears that large portion of Victoria Nyanza's surface is only a foot or so above the bottom and much of it filled with reeds and grasses.

We now find the following paragraph among those issued by the science service for use in newspapers as something "Interesting to know."

"It is estimated that Lake Superior exceeds in size its nearest fresh water rival, Africa's Lake Victoria Nyanza, by a thousand square miles."—Port Arthur News-Chronicle.

COULD NOT SEW A BUTTON ON

Her Hands Were Helpless With Rheumatism

At one time she thought she would lose the use of her right hand. But "a blessing"—in the form of Kruschen Salts—put her right again. "I was sure in a bad state," she writes. "In fact I could not do my housework, I was so bad with rheumatism in my arms and hands. I could not sleep at night, and I thought I would lose the use of my right hand. I could not hold anything, nor could I sew a button on my arm would go dead. I was advised to try Kruschen, and inside of three weeks I found such a change. I have kept on taking it, and now sleep all night—thanks to Kruschen's help and relief."—(Mrs.) J. H.

Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals, which are responsible for rheumatic agony. Other ingredients of these salts assist Nature to expel these dissolved crystals through the natural channel.

Germans Challenge Record

Bremen and Europa Will Make Attempts With Reserve Power

According to hints from German shipping quarters, the North German Lloyd liners Bremen and Europa will take up the battle for the "blue ribbon" of the Atlantic, which has been won by the French liner Normandie.

Open expression of this determination was given by the Boerzen Zeitung in a dispatch from Hamburg.

"It is not unlikely," the dispatch said, "that the Rex (Italian liner) or Bremen or Europa have still some horsepower in reserve with which they may give the Normandie a surprise."

That the two German vessels have never used their top speed in their regular runs and have been holding back for just such competition as the Normandie or the Cunard-White Star Queen Mary is a story that always has been believed in Germany—with what justification remains to be seen.

Town Seeing Double

Contest In California Brought 500 Pairs Of Twins

Five hundred pairs of twins answered the call when Long Beach, California, announced a twin contest. Youngest were Patricia Gale and Gale Patricia La Forte, 11 weeks.

Oldest were H. E. and A. L. McArthur, hale and hearty at 85. A twin judge performed at a twin marriage ceremony attended by 11 pairs of twins as bridesmaids and another pair as flower girl and ring bearer.

The town is still seeing double.

A Swedish geologist concludes that the South Island of New Zealand had a warm, almost sub-tropical climate no longer ago than about 1000 B.C., after which the climate became much colder for reasons not fully understood.

Queen Likes Natural Folks

Not Reserved If People Chat With Her Freely

In the Jubilee number of The Manchester Guardian a contributor writes about Queen Mary this way: "The Queen's mind is powerful rather than quick. She once said to a friend, 'I find it a great effort to think of something fresh to say to everyone I meet.' The friend replied, 'Oh, your Majesty should not try. If I were in your place I should think of something nice to say when I got out of bed and say it to everyone I met that day.' But the Queen replied: 'Oh no, you would not. The press would get hold of it and say that you were insincere.' Whatever else anyone said of the Queen it would be impossible to call her insincere."

At a first meeting people often leave all the conversation to her Majesty and so find her difficult to get on with and think her reserved. A very slight acquaintance, however, helps them to realize her extraordinary kindness of heart and the way in which she never forgets anyone she has ever met or misses a friend. The Queen is so kind to be interested in any case of suffering or want, and meets the person who brought it to her notice again, it may be 20 years after, she will at once say, "And how is So-and-so? I hope everything is going on well."

In fact, anyone who will chat freely with the Queen as he would with any other lady, relying on her kindness and sympathy, will find her at once easy to get on with and charming. Her wide knowledge of the subjects that do interest her, her readiness to say when she is not an authority on any subject, her ready humor and her sincere kindness make a conversation with her a thing to remember. Her chief interest in life now is undoubtedly the little Princess Elizabeth. She is wrapped up in her, and no wonder; for a more charming little girl or one more completely unspoiled by her high position, it would be impossible to meet.

Charged With Writing

Anti-Italian Articles

Italy Has Expelled Rome Correspondent Of Chicago Tribune

The Italian government press bureau has expelled David Darrah, the Rome correspondent of the Chicago Tribune. Darrah and his wife were forced to leave immediately. The reason for Darrah's expulsion was given as the writing of anti-Italian articles.

The bureau also issued an order banning until further notice the entrance of copies of the New York Times to Italy as a result of an editorial entitled "Baldwin and Muscatini."

The editorial appeared in the Times after recent speeches of Prime Minister Stanley Baldwin of Great Britain and Premier Benito Mussolini of Italy.

The action against the New York newspaper follows a similar one against a group of English newspapers, including the Manchester Guardian, and the lifting of a ban against German newspapers, including the Nazi organ, the Volkischer Beobachter.

The human scalp has approximately 1,000 hairs to the square inch, the average head containing 110,000 hairs. Women have a higher average than men, while red heads average only 90,000.

What are the mild leaves saying?

"You've got to be good to get into Qaden's!" And it's true—only the choicest, mild, fragrant tobaccos are selected for Ogden's Fine Cut. So why shouldn't Ogden's be smoother and cooler? You simply can't beat Ogden's—it's got all you want in a cigarette tobacco.

Ogden's Fine Cut and "Vogue" or "Chanticleer" papers . . . any man who's tried the combination will tell you it's a guarantee of better and more satisfying cigarettes.

Makes Testing Safer

Spinning Device Determines Whether Auto Wheels Need Adjusting
Eliminating hazardous road tests for "shimmy" and wobble, a dynamic spinning device subjects each wheel to a similar test without removing the car from the repair shop. The machine consists of a spinner wheel mounted on the shaft of an electric motor and carried on a small rubber-tired dolly. The speed of the motor is controlled from the end of a tubular handle like a vacuum cleaner. The spinner wheel rocks from side to side for adjustment to the planes of the cambered auto wheel so that the tire will not be damaged. The test is made with the wheel on the spindle, each wheel being jacked up and spun with the machine. The motor quickly accelerates the wheel to eighty or 100 miles an hour. When the shimmy speed is reached the whole car shakes violently, indicating the wheel is out of balance and that it should be removed and trued up.—Popular Mechanics.

History Goes To Show That Manners Do Not Change With The Times

In these days the average citizen accepts restrictions and regulations with resignation. He knows that it is useless to rebel, and if pressed for a reason as to why they should be necessary he murmurs something about "the complexity of modern life—think of my own childhood—no motors, no wireless, no airplanes—no wonder we have to have regulations."

Yet although traffic restrictions are our latest topic of conversation, actually they were in existence in the time of the Romans and are, in fact, ancient history. Indeed, in 45 B.C. the parking of chariots in the highways during business hours had become such a nuisance that by a decree of Julius Caesar chariots were forbidden to enter the trading centres during marketing hours—an even harsher edict than the modern two hours' limit!

The modern woman in her search for the latest mode is equally behind the times. In these days when berets are precariously perched on the side of the head and hats obscure one eye and ear, it is interesting to read the newspapers of a century ago. The "Morning Chronicle" in 1800 contains a long article on the vagaries of fashion, suggesting that female fashions have a deleterious effect on national morality. The author states that "an evil practice has lately grown up among dandy girls, to cock their bonnets, not upon the middle of their heads, as was used of old time, as is decent and seemly, but upon the side thereof; whereby it cometh to pass that one of their ears is uncovered, discovered and laid bare, while the other lies hid, concealed and out of sight, which doth greatly disturb His Majesty's liege subjects of all degrees, ranks and employments that are told that "false dancings" would not willingly enter a house where social was held. In 1661 John Evelyn was so much appalled by the smoke-laden atmosphere of London that he wrote a treatise on "The Inconvenience of the Air," which he dedicated to "His Sacred Majesty"—D.F.J., in the Manchester Guardian.

Peas Of Birds And Cattle

More Than 2,000 Known Species In The World

Most species of birds and animals are subject to infestation by small insect parasites known as biting lice. These parasites are related to the sucking lice, which were so troublesome to soldiers in the World War. The biting lice pass their whole lives on the bodies of birds and animals and soon die if removed from their hosts. There are more than 2,000 known species in the world, the majority occurring on birds. Some of these infest domestic poultry and, when numerous, cause loss of weight and decrease in egg production; others are a pest on cattle and horses.

A survey to determine the number of species of these lice on wild and domestic birds and animals in Canada is being carried out under the direction of the Dominion Entomologist. Ornithologists, taxidermists, game wardens, naturalists and others whose activities bring them in close contact with wild life, are co-operating by collecting lice and sending them to Ottawa where they are mounted on slides and examined and classified under the microscope.

There are many species of plants in the Canadian Arctic that do not occur outside that region. Among these may be mentioned Arctic willow, Arctic dogwood, Arctic scurvy-grass, Arctic loco-weed, Arctic shooting star, Arctic primrose, Arctic lousewort, and Arctic ragwort. There are other plants and herbs mainly Arctic in their distribution.

Weed Seeds On Farms

Prolific Production Of Seeds Quickly Infests The Soil

The seed of most annual weeds when embedded in the soil retain their vitality for several years. The seeds of the mustard family and others, when ploughed down after ripening, seldom germinate the following year and not until they are brought near the surface by further cultivation. Light surface cultivation during the early autumn usually serves to stimulate germination in freshly ripened weed seeds. Thus, a considerable proportion of them may be destroyed, while, on the other hand, by deep ploughing the difficulty is simply deferred to succeeding years.

The germination of weeds, as well as other seeds, is affected by heat. Many kinds of weed seeds, such as some grasses and mustards will germinate in the late autumn or early spring when the soil is cold. Others, such as buckwheat and musk quinters, require a warmer soil, and the seeds of foal and purslane continue dormant until stimulated by the heat of summer. Late autumn or early spring cultivation is not effective in destroying the seeds of weeds that will not germinate unless the soil is warm. Received this information from the permanent weed committee, over which he presided. Minister of Agriculture Edmond Rossini recalled the 1934 harvest was 232,413,760 bushels as compared with 300,940,000 bushels in 1933. He pointed out the price of wheat had been strictly maintained because of the 1934 crop deficit, due to the close co-operation of farmers' organizations and the government.

British Tommy Likes Scarlet

Red Tunic Of Old Days Will Again Be Worn

Scarlet tunics are to be the vogue for the British Tommy in future. After the Great War the army did away with the redcoats and clad the troops in the more sombre khaki of the army in the field. That has proved to be a double blow. Recruiting has dropped off and the cloth mills have missed the annual orders they used to receive for the supply of scarlet tunic cloth.

It costs two dollars per yard for the right kind of material and it will require about 1,600,000 yards for the first order. So mills in the North are perking up with the thought of giving employment to men and women in the production of the order which will run into millions.

Not only will the army in the British Isles be changed to scarlet tunics, but the Indian army and the other overseas forces will wear the red of the old days, too. The Government has found the enlisted men like to cut a dash when they go on parade and the authorities are ready to encourage recruiting by meeting the desire to make an impression in the scarlet of yore.

After the Armistice of 1918 private citizens thought war and armies were on the way out. Instead of that, the old military customs are stronger than ever. Great Britain did try to give a lead to disarmament, but others would not follow—Border Cities Star.

Substitute For Mercury

Mercury will solidify at around 40 degrees below zero, Fahrenheit. But for measuring colder temperatures than that, alcohol is a good substitute. Alky will stay fluid to 248 degrees below; then it'll crystallize. (They have to use gas for measuring temperatures lower than that).

Statute Of Westminster

Passed In 1931 But Few People Know Its Existence

Now is the time when all good men like to contrast the rigidity of our old Constitution with the free and fluent way they do things in the British Empire. What, for instance, is the Statute of Westminster? The name turns up in the news from time to time. It was in the news the other day when the Judicial Committee of the Privy Council in London ruled that it can hear no appeal from Canadian courts in criminal cases or from Irish Free State courts in all cases.

What is the Statute of Westminster? It was passed in 1931 and gave effect to the findings of the Imperial Conference of 1926. The motherland and dominions are "autonomous communities within the British Empire, equal in status, in no way subordinate to one another in any aspect of their domestic or external affairs, though united by a common allegiance to the Crown and freely associated as members of the British Commonwealth of Nations." That reads like quite a constitutional document, yet it is doubtful whether one Englishman in ten has ever heard about the Statute of Westminster.—New York Times.

Italy's Wheat Crop

Will Be Sufficient To Meet All Requirements Of The Country

Italy's wheat crop this year will be well in excess of that of 1934 and will meet all the requirements of the country. Premier Benito Mussolini received this information from the permanent wheat committee, over which he presided.

Minister of Agriculture Edmondo Rossoni recalled the 1934 harvest was 232,413,760 bushels as compared with 300,940,000 bushels in 1933. He pointed out the price of wheat had been strictly maintained because of the 1934 crop deficit, due to the close co-operation of farmers' organizations and the government.

Earthquake Disturbances Have Occurred Frequently In Last Quarter Century

Doing Excellent Work

Gravel Mission Is Invaluable To People In Labrador

North of the St. of Belle Isle, the Gravel Mission has three very fine centres of work, each having a cottage hospital and boarding school. St. Mary's river is nearest the Straits. Improvements are constantly being made and one of the latest and most valued is a reservoir for fresh water, so it may not be contaminated. This cottage and school serve several small communities. Cartwright, Labrador, at the mouth of Hamilton Inlet, also has a cottage and school, likewise an excellent water supply. Nurses and teachers are in charge, with occasional visits from doctors, whose headquarters are further down the Bay. Cartwright bids fair to grow, being on the direct route of stores across the Atlantic, east and west. It had the Italian Armada last summer, also such distinguished visitors as Colonel and Mrs. Charles Lindbergh. Dr. H. L. Paddon has been on the Gravel staff for twenty years, and is a graduate of Oxford and London, like his chief, Sir Wilfrid. With the fine launch "Marval" he travels almost constantly in summer, visiting his large parish, and with dogs in winter, travels several hundred miles, going north among the Eskimos. The Gravel staff is of great value to all the families in small settlements along Hamilton Inlet, and doing invaluable work for the future.

When water is scarce from drought or some such cause, deciduous trees shed their leaves early as a protective device, since it is through its leaves that a tree loses most of its moisture.

Scientists claim that an earthquake zone girdles the world, and the claim has been regrettably well supported so far this year. The most recent evidence is that supplied from Baluchistan, where reports recently coming from stricken Quetta give some faint idea of the disaster that overtook a wide area.

This is another of the eruptive cataclysms which have shaken India within the last few years. The killed in Baluchistan are estimated to exceed 50,000. This is twice as many as were killed in the greatest calamity of this kind that rocked 1,625,000 square miles in Central India in 1897. It is eight times those killed in the earthquake that scarred the plains a few years ago, but the area affected in Baluchistan is not so extensive as was that of the towns and agricultural portion destroyed a few years ago.

Fortunately, Quetta being a well supplied station, and being the headquarters for the services in Baluchistan, supplies are in store, but doctors and nurses are needed. Those mobilized at Lahore, Karachi and other points were finding difficulty in reaching Quetta, for the planes that were to fly them could not make safe landings on the river grounds.

The point of this new disturbance is in the zone that has been seismologically active this year. In April Formosa was killed and about 3,185 were killed and 10,400 injured. Then directly to the east almost of Baluchistan, Iran, or Persia, experienced a very bad shock on April 23, when more than 600 were killed. A week later, slightly north of Persia, but in line with the disjointed mountain range that passes from Baluchistan through Afghanistan toward Turkey, there, on the latter's border with Russia, 2,000 persons were killed in a very convulsive shock. And a week or so before the Quetta disaster, at Shikarpur, a city within the area just shaken, there were renewed shocks that damaged a great many houses. In all, there have been 28 earthquakes disturbances so far this year along the earthquake zone, the first to be noted being one of great intensity in southern Tibet during the first days of January.

These disturbances are noted in a few moments on delicate instruments located thousands of miles away, but they come with the suddenness that is unpredictable. They are a form of earthly distress which remains a mystery. They are said, by some, to be caused by the "moon's pull," which is said to crash the earth's crust where it has weaknesses, just as tidal waves are said to be caused by submerged upheavals perhaps far distant from where the most damage is done. But whether because of the more accurate recording cannot be said, it seems apparent that earthquakes have been extremely active in the last quarter century, and, for the most part, their demolition has been worst along the zone which passes through India and on to the Pacific Islands.—Winnipeg Free Press.

Building Paved Highways

Germany Is Making Preparations For Increased Motor Traffic

During the next six years Germany plans to build 4,000 miles of paved highways which will permit speeds of from 75 to 140 miles per hour. This year 200 miles of the network are to be constructed with the remaining mileage following later.

With more motor cars in Europe and many tourists wanting to drive through the various countries, roadwork has become an important item in government plans. Germany is planning one fast main route from Hamburg in the north to Switzerland in the south. Other east and west highways will form a grid to cover the nation.

Don't deny enjoying life till you get everything else. You're not going to be here perpetually.

The SNAPSHOT GUILD DON'T BE EMBARRASSED

Don't let crowds interfere with your picture taking for there are too many picture possibilities to overlook.

Every day we learn more about amateur photographers and, surprising as it may seem, and that many feel somewhat embarrassed taking pictures in view of the public eye. They shrink from the attention they erroneously believe they attract. To feel that way is really absurd.

That type of self-consciousness will be the cause of your missing many interesting pictures. You can rest assured there is no thought of ridicule on the part of those who may be apparently watching you snap a picture. Nine chances out of ten the spectator is curious and wishes he owned a camera or had one with him.

There are times, however, when you may want to conceal your camera—and your actions—as much as possible; not because of embarrassment but because of the unusual human interest picture.

Everywhere you go in a city, whether it is in the park where babies are perambulated by their nurses, or in the gloomy slums where some immigrant mother haggard the family wash while ragged little urchins play perilously on upper balconies, you can find dramatic, story-telling pictures. As you walk through the streets and parks there are countless opportunities for snapshots that are really unusual, and such pictures will give new life into your snapshot album.

When you come upon a good picture possibility in the form of a person or persons in action, that is the time you want to conceal your cam-

era and intentions as much as possible, for to get the best results, your subject should not be conscious of your presence. On approaching such subjects, it is best to set your focusing scale at a distance from which you believe you will get the best results. Judge your light and properly set the diaphragm and shutter speed. When you are "all set," approach your prey quite nonchalantly and when you reach the proper distance to take the picture you are after, shoot without further delay and you are unsuspecting victims will have unknowingly furnished you with good snapshot material.

This kind of amateur photography can be employed in so many places. This is especially true in the summer, for if there is any place to get informal, candid camera pictures, it is on picnics, at your local swimming pool, or the favorite old swimming hole at the seashore or summer resort.

And, speaking of summer resorts, have you noticed the number of nationally known people—stage and screen stars, members of socially prominent families, and even great business leaders—who are pictured in newspapers and magazines with their cameras in action. It has really become the smart thing to own and use a camera.

So rally forth with your camera with all the abandon of a sailor, strolling with one of his many sweethearts and get the kind of pictures your friends will talk about and prize.

JOHN VAN GUILDER

WORLD HAPPENINGS
BRIEFLY TOLD

The motor car age is finding its old competitor still going strong in Conway, Missouri. Thirty hitching posts are being erected in the business district to accommodate those who still drive horses.

A paper circle, two inches in diameter and cut from a plain playing card, is expected to fetch nearly \$15,000. The card bears on its back a miniature portrait painted by Holbein the Younger during the reign of Henry VIII.

Evangeline Booth, commander-in-chief of the Salvation Army, said she will visit Canada and the west coast of the United States next September. The visit will be part of the army's "two years—two million souls campaign."

Preparation of motion picture films to be used for educational purposes in small towns and rural communities in the fight against fire hazards was discussed at a meeting of the Canadian Association of Fire Marshals in Ottawa.

All weather highway between Edmonton and Jasper, and graveling work on the trans-Canada road will be completed this year, acting Premier George Hoadley announced at Edmonton.

A government bill empowering the finance minister to float loans to a maximum of \$750,000,000 was passed by the House of Commons. It was expected the government would enter the money market on a refunding program when it was favorable this fall.

A drop of more than \$3,000,000 was shown in the total deposits of the Bank of Canada during the week ended June 12, according to the Bank of Canada statement recently issued. The reserve in United States funds for the same period declined by more than \$2,225,000.

Seven-year-old Mickey Teahan of Richmond, Ont., weighs 60 pounds, and when he looked a 48-pound muskellunge in the Ottawa river near Lake Deschênes he was almost pulled into the river. Mickey's father came to his rescue and the muskie was landed.

One Way To Save Money

Cash Register Drawer Sticks And Reveals \$291 Deposit

Lawson McKague, general merchant, of Viceroy, Sask., is richer by \$291. He has been putting a small change into a savings bank but didn't know it.

The drawer on the cash register in his store had been balky for several weeks. It hadn't closed as it should when it was put shut. A short time ago a Regina traveller dropped in and offered to repair the machine. The traveller finally got the drawer open and 500 or more dimes tumbled to the floor. Further investigation revealed the register was so bunged with silver the drawer couldn't close. Several customers in the store helped him gather it up. When counted it totalled \$291, mostly dimes, some nickels and a dollar bill, weighing 14 pounds in all.

The silver had slipped through a crack in the back of the till. The storekeeper had often found dimes and nickels and dollar bills but didn't know the till was "leaking." The silver had accumulated over the past ten years.

First Camp Fire Word

Scientists Discover Primitive Chinese Chose Redbud Tree

When Peking Man, earliest known human of China, chopped wood for his campfire 100,000 years ago, he chose a red bud or Judas tree, according to botanists of the Geological Society of China after training microscopes on remains of the oldest known fire laid by human hands.

Cross-sections of bits of charred wood from Peking Man's hearth are identified by their structure as a new species of *Cercis*. This tree would be a redbud, akin to modern redbuds that flower with purplish-red blossoms in the spring in America and the Orient.

World Needs Peace Assurance

President Roosevelt Says Mutual Understanding And Regard Is Needed

Greatest current need of the world is "the assurance of peace—an assurance based on mutual understanding and mutual regard," President Roosevelt asserted before the graduating class of the United States military academy. "We maintain an army to promote tranquility," the president said, "and to secure us from aggression, but it is so created and so modest in proportion as to furnish poor no threat or menace to the rights of others is even remotely intended."

London's Transport System

To Spend \$170,000,000 In Five-Year Program

Thirty-five million pounds—approximately \$170,000,000—will be spent in a five-year program for the improvement and extension of London's transport system. The necessary loans will be backed by government guarantee.

The program involves the building of 12 miles of new subway, the electrification of 44 miles of suburban railway, the double-tracking and electrification of about 12½ miles of other suburban lines, and the substitution of "trolley buses" for street cars on 148 route miles.

Recipes For This Week

(By Betty Barclay)

COCOA CRAN PUDDING

- 1½ cups (1 can) sweetened condensed milk
- 3 cups finely diced bread or sifted soft bread crumbs
- ½ cup cocoa
- 2 eggs
- 1 tablespoon melted butter
- ¼ teaspoon salt
- 1 teaspoon vanilla

Blend sweetened condensed milk with hot water; pour over dried bread or crumbs which have been thoroughly mixed with cocoa and let stand until cool. Stir in eggs, lightly-beaten, melted butter, salt and vanilla. Pour into baking dish, set in pan of hot water. Bake in moderate oven (350 degrees F.) forty-five minutes. Serve with plain cream or fruit sauce. Serves eight.

SAUSAGE STUFFED BAKED APPLES

- 1 pound pork sausage
- 4 cooking apples
- 1 cup sugar
- 1 tablespoon butter

Pare the apples and remove the centres. Stuff with pork sausage. Place in a baking dish. Sprinkle with sugar and dot with butter. Add 1 cup water, cover and bake in a moderate oven (350 degrees F.).

SUNDAY SCHOOL LESSON

JUNE 30

LIBERTY UNDER LAW

Golden text: It is good not to eat flesh, nor to drink wine, nor to do anything whereby thy brother stumbleth. Romans 14:21.

Lessons: Romans 14:13-21. I Corinthians 8:1-13.

Devotional reading: Galatians 5:16-24.

Our Responsibility for Our Brother, Romans 14:13. "But thou, why dost thou judge thy brother?" questions Paul in the preceding verses "or thou again, why dost thou set at naught thy brother? For we must all stand before the judgment seat of God."

"I may feel at perfect liberty to drink wine. And I only myself to consider, and knowing that my temptation does not lie that way, I might use wine regularly or as often as I felt disposed to enjoy a needed stimulant. I may feel quite convinced in my own mind that morally I am not one whit the worse for doing so. But I cannot determine whether I am to indulge myself or not without considering the effect my conduct will have on others. There may be among my friends some who know that their temptation does lie that way, and whose conscience bids them altogether refrain. If by my example such persons are encouraged to silence the voice of their own conscience, then I incur the incalculable guilt of helping to destroy a brother for whom Christ died." (Marcus Dods)

The Important and the Unimportant, verses 17-19. For the Kingdom of God the reign of Christ over men, is not eating and drinking; the important matters are righteousness and peace and joy in the Holy Spirit—through his indwelling. "Religion is love and joy and peace in the Holy Ghost; the cheerful trust in the world; it is inconsistent with moroseness, sourness, and with what is not according to the gentleness of Christ Jesus." (John Wesley). He who serves Christ in this way is pleasing to God and man. So then let us pursue things that make for peace, and things whereby we may improve one another, that is, let us consider what effect upon others our conduct will have.

For Better Understanding

Will Examine Relationship Between Canada and U.S.

An educational laboratory for examination of the relationship between Canada and the United States was set up at St. Lawrence University. Into it will walk 50 or more prominent Canadians and Americans with the announced intention of seeking common factors for understanding and friendship.

Sponsored by the Carnegie Endowment for International Peace, St. Lawrence University and Queen's University, Kingston, Ont., the laboratory will be known simply as "the conference on American-Canadian affairs."

The conferees figuratively will take apart the international mechanism that runs Canadian-American affairs and put it together again.

FASHION FANCIES

ACCESSORIES TO ACCOMPANY

SIMPLE FROCKS

By Ellen Worth

And set them off most delightfully easily made! It takes just the minimum of effort and material to make these scarves and sports vest. The vest may be in either short or bosom length. They lend sports chic to the most simple frock. Necktie silk or cotton, plain or prints in tub crepe silk, shantung, linen, pleque and many other fabrics are popularly used.

Today's pattern also provides for both hats illustrated. They may match or contrast with the scarf. Style No. 619 is designed for one size only. For requirements see pattern envelope.

Patterns 15c each. Address mail orders to: Pattern Department, Winslow Newspaper Union, 175 McDermott Ave. E., Winnipeg.

The latest Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to brighten the lives of stay-at-homes. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 15 cents.

Lobster Production

Canada Provides Nearly The Whole Of The World's Supply Of The Canned Product

Off the coast of Canada's Atlantic provinces the world's greatest lobster-producing area is located, and in a few years more than 300 canneries draw from these resources the raw material from which they produce one of the tastiest of sea foods. In recent years an increasing part of the Canadian catch has been marketed alive—"shipped in the shell" is another way of saying it—but most of it, however, still goes into cans. In the past five years the total annual pack put up in Nova Scotia, New Brunswick, Prince Edward Island, and Quebec, has averaged, in round figures, 137,900 cases containing 45 standard-sized cans each.

Lobster canning involves a number of different operations, and Canadian lobster canneries are required by law to measure up to certain standards as to sanitation, equipment, and methods. Their operations are subject to inspection under the Meat and Canned Foods Act, which is one of the reasons they turn out so excellent a product. Canada supplies all but a very small part of the world's production of canned lobsters.

Take Pay In Water

Members of the town council of Waukomis, Oklahoma, have voted salaries for themselves—payable in water. From the city's "liquid" assets each member will receive free 1,000 gallons a month from the municipal plant.

Little Journeys In Science

IODINE

(By Gordon H. Guest, M.A.)

Iodine was discovered in 1812 by the French scientist, Courtois, who obtained it from the mother-liquor of salts produced from the burning of seaweed, or kelp. When the liquid was heated with sulphuric acid in a retort, a violet vapour was produced, which condensed in the form of brilliant crystals. Shortly after this discovery this substance because it comes from the Greek word for violet.

Iodine occurs in sea-water, in sea-plants and sea-animals, and in the thyroid gland of man and of animals. Most of the iodine of commerce is obtained from a compound called sodium iodate, which is found in small quantity in Chile saltpetre, or crude sodium nitrate.

Iodine is a shining, blackish-gray solid, which is nearly five times as heavy as water. It has a strong, rather unpleasant odour, and changes to the vapour state even at ordinary temperatures. It is quite soluble in alcohol and a weak solution of potassium iodide. We are all familiar with iodine in the form of tincture of iodine, which is nothing more or less than iodine crystals dissolved in alcohol. A very small quantity of iodine crystals starch solution a deep blue and this is an exceedingly delicate test for the element.

Iodine is used in the manufacture of certain types of drugs which are very helpful to man. The largest consumer of iodine is the photographic industry which uses the compounds, silver iodide and potassium iodide, in large quantities.

Iodine is an essential constituent of the body. A small gland known as the thyroid gland contained in the bunch of cartilage at the front of the throat is usually designated as Adam's Apple, produces a compound known as thyroxin which contains about 8.5% of iodine. If iodine is not present in the diet the thyroid gland cannot produce this compound and hence goitre results. Iodized salt is now prepared for table use, the small amount of sodium iodide present in the salt being considered sufficient to guard against a natural deficiency in the regular food. Iodine is supplied by certain foods, such as spinach, lettuce, string beans, butter, and milk.

Don't Let One Fly Escape

Constitute A Deadly Menace And Must Not Be Tolerated

Do you know that one fly lays one hundred to two hundred eggs in one batch? It doesn't take much imagination to figure out the consequences if a few flies are allowed to roam around.

Of course, you and I loathe flies because they are irritating and disgusting, but though we have no urge to get rid of them, we are not all over careful of preventing their breeding.

All garbage and refuse must be covered or burned, manure, rotting leaves kept well away from dwellings and all surroundings kept as scrupulously clean as possible. However, there will always be some flies around some places. Screen on doors and windows will help to keep them out of the house and all exposed food should be kept covered.

A few Wilson's Fly Pads, used regularly during the warm weather, in home or store, will kill all the flies that happen to get in by using according to directions.

Medical authorities and scientists have proved by the most careful tests that the common house-fly spreads deadly germs of infantile diarrhoea, the dreaded warm weather complaint that claims the lives of so many little children.

Flies are a deadly menace and must not be tolerated. A fly will come straggling from a heap of filth and settle on food or drink, if the latter is not protected, spreading disease that may cause a death right in your own home. Those citizens who have any regard for the welfare of their neighbors and community will wage unremitting war against fly pests and Wilson's Fly Pads will be invaluable assistance in their efforts.

Nova Scotia Very Scotch

Parliament Is Always Opened By Skirt Of Haggis

Nova Scotia, the land of Longfellow's "Evangeline" and popularly believed because of that poem to be largely French and English, is largely Scottish. The opening of Nova Scotia's Parliament is accompanied by the skirt of haggis, and several newspapers are printed in Gaelic. In the Nova Scotia county of Inverness, 72 per cent. of the inhabitants speak Gaelic, while less than half of the similarly named county in Scotland can speak that ancient tongue. — Provincial News Bureau.

Household Arts

by Alice Brooks

Cutwork Is Simple and Durable Needlework

PATTERN 5224

Tulips—how we enjoy the beauty and variety of their color. Here we find them translated into striking cutwork, that needlework that is so handsome and durable. This design has no bars—and plenty of opportunity for color. You can do it all in one color or white, of course, but it is especially effective with the tulips done in varied colors and the leaves in green. You can make a striking cushion of the larger piece or a handsome buffet or chair back seat of the three pieces.

In pattern 5224 you will find a transfer pattern of the basket 10 x 14 inches and reverse of the small pieces 8 x 10 inches; complete instructions for doing cutwork; illustrations of all stitches needed and material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

BENNETT WILL CONTINUE TO LEAD THE GOVERNMENT

Ottawa.—Definite assurance only a breakdown in health will prevent him continuing as leader of the government was given by Prime Minister R. B. Bennett at a complimentary banquet tendered him by Conservative members of the House of Commons and the senate.

It had been expected Mr. Bennett would take this occasion to convey to his parliamentary colleagues some intimation of his intention with respect to the leadership in view of the anxiety created by his recent illness.

The banquet was private and the guests confined to members of parliament who support the government.

J. Earl Lawson, Dominion organizer for the Conservative party and member for the Toronto constituency of York West, in a statement at the conclusion of the banquet, said: "Despite the fact it may mean great sacrifice of the prime minister's health, his sense of duty to the Conservative party and to his country will induce him to carry on as leader of the government."

The banquet was the first occasion on which the prime minister has met his colleagues in a body outside the House of Commons since his illness. No caucus have been held since his return to active participation in parliamentary affairs.

When he first returned, Mr. Bennett, abated his customary long hours of work and did not attend evening sessions of the house. During the past 10 days, however, he has been a constant attendant at both afternoon and evening sessions, spending the mornings in his office, and he has held a cabinet council every week day since his return from England.

Essay Winner

Edmonton Girl Student. To Receive Free Trip To Australia

Toronto.—Grace B. Pattullo, 18-year-old student at Eastwood high school, Edmonton, wins the free trip to Australia offered for the best essay on that country by a Canadian high school student. Announcement of the awards was made here by L. R. Macgregor, Australian trade commissioner to Canada.

The \$50 prizes offered for the best essays from each of the other provinces include:

British Columbia (tie), Grace Wall, North Vancouver, and Marcella A. Jabour, Prince Rupert; Saskatchewan, Margaret McGregor, Nutana college, Saskatoon.

Miss Pattullo, the all-Canada winner, is expected to accompany Hon. F. H. Stewart, M.P., and Mrs. Stewart to their home near Sydney, Australia, this autumn.

Senate Rejects Bill

Newspapers Will Not Have To Publish Shareholders' Names

Ottawa.—Marking its seventh failure in 10 years, the bill of T. L. Church (Cons., Toronto East) to compel newspapers to publish names of their shareholders was thrown out by the senate. With Senator James Murdock (Lib., Saskatchewan) as sponsor, the upper house adopted the report of its banking and commerce committee rejecting the measure as "ineffective to attain its purpose."

Change Was Approved

Ottawa.—The House of Commons took less than two minutes to give second and third readings and consideration in committee stage of a technical change in the delinquency laws. The bill originated in the senate and was requested by children aid societies. A bill making a companion change in the criminal code also was passed.

Duke Will Head Council

London.—The Duke of York will be chairman of the advisory council which his brother, the Prince of Wales, is forming to assist in administering the king's public trust, it was announced.

Charge Discrimination

Dominion Is Made That Canada Is Unfair To U.S. Trade

Canton, N.Y.—A spirited reply to an American charge of tariff discrimination was given at the conference on Canadian-American affairs by John W. Dafeo, editor-in-chief of the Winnipeg Free Press, and two Canadian educationists—Professor Frank A. Knox, of Queen's University, and Professor Robert McQueen, of the University of Saskatchewan.

Dr. Dafeo said the charge of Protectionism, of Chicago, that Canada, with its three-tariff system, was discriminating against the United States, had not been proved.

Under our system of main, intermediate and empire tariff schedules," he said, "we go to other nations and offer them the intermediate rate on their goods in exchange for a preferred consideration of our wheat. The Americans with a single tariff, argue we have been unfair because we have three tariffs, and the United States is not favored by our intermediate tariff. It is our contention, however, concession should be given for concession," which has not been done under the inflexible single tariff system.

Dr. Dafeo said he believed the difficulties between the two countries could be composed if the United States did not have a single tariff system, but had variable tariffs.

Would Unite Dionne Family

Ontario Government Outlines Plan For This Purpose

Toronto.—Chief guardian of the Dionne quintuplets, Hon. David A. Croft, Ontario minister of welfare, disclosed that when he attended the babies' birthday celebration in Calander, May 28, he outlined to Olivia Dionne, their father, the government's plans to reunite the Dionne family in one large home.

"I invited Mr. Dionne to ponder the plan for a few days, then come to Toronto," said Mr. Croft. "I have not since seen Mr. Dionne."

"I want to see the Dionne family reunited and hereby ask your permission to erect for you, out of the fund accumulated, a house sufficient for yourselves and your whole family in which the quintuplets may be properly accommodated," said Mr. Croft in the letter he wrote Olivia Dionne, June 5.

"The present hospital may then be used as a schoolhouse for all your children," he continued.

The offer carried only two conditions—government control of business affairs of the children and retention of Dr. Allan Roy Dafeo as the babies' physician.

May Visit Canada

Ramsay MacDonald May Pay Social Visit To Friends In Dominion

London.—Ramsay MacDonald, lord president of the council and former prime minister, was disclosed to have under consideration an invitation to pay a social visit to friends in Canada.

It was not learned who issued the invitation, but it was recalled the diplomatic correspondent of the Daily Herald said Mr. MacDonald might go to the United States as a special representative to discuss with Washington authorities possibilities of Anglo-American co-operation in world affairs.

Decrease In Fire Losses

Since 1924 Amount Has Decreased By Twenty Millions

Ottawa.—Fire losses in Canada in 1934 decreased by more than \$20,000,000 as compared with 1929, George F. Lewis, O.B.E., Toronto, president of the Association of Canadian Fire Marshals, revealed in opening the annual conference of the association here. While fire losses as a whole had decreased in number and amount, it was disturbing to note, Mr. Lewis said, fires in dwellings have increased from 16,943 with a loss of \$7,000,000 in 1924 to 32,436 with a loss of \$9,567,000 in 1934.

Archaeologists in Germany have uncovered a knife with a folding blade estimated to be at least 10 centuries old.

SIR ARTHUR ROSTRON

Veteran commander of the Mauretania for 11 years, who could not bear to see the auctioneer selling off the furnishings of the famous liner so did not attend the sale. He prefers to remember the great liner as he knew her at the height of her fame.

Fills Seven More Posts

Premier Baldwin Appoints Many Former Government Members

London.—Prime Minister Stanley Baldwin filled seven more posts in his government, announcing the following appointments to posts of non-ministerial rank:

Minister of mines—Capt. H. F. C. Crookshank.

Minister of pensions—R. S. Hudson.

Under-Secretary for the home office—Capt. Euan Wallace.

Financial secretary for the admiralty—Sir Victor Warrender.

Civil lord of the admiralty—Kenneth Lindsay.

A member of former Prime Minister Ramsay MacDonald's Little National Labor party, Lindsay has never held office before. Crookshank has been under-secretary for the home department, Hudson parliamentary secretary for the minister of labor, and Wallace civil lord of the admiralty.

Leslie Hore-Belisha, former minister of transport, and Sir Thomas Inskip, former attorney-general, were assigned the same posts in the new government.

Held Without Trial

British Subject Claims He Was Kept Prisoner For Four Years

Port of Spain, Trinidad.—Colonial authorities heard the story of George Weeks, a British subject, who declared he had been held in a Venezuelan prison four years without trial, under threat of torture.

A native of Trinidad, Weeks signed a statement he had been refused right of communication with British consular officers during confinement.

It was understood authorities were considering a claim for damages against the Venezuelan government.

EARL OF BESSBOROUGH AT PETAWAWA

The Governor-General travelled to Petawawa Military Camp, Pembroke, Ont., a few days ago to perform the ceremony of laying the cornerstone of the new Administration building. In the picture His Excellency is getting the cornerstone in place.

Suggests New Commission

President Of Canadian Radio League Presents His Views

Canton, N.Y.—Graham Spry, president of the Canadian Radio League, told the conference on Canadian-American affairs that the Canadian Radio Broadcasting Commission has failed and suggested a 15-point constitution for a new broadcasting system in the Dominion.

Mr. Spry proposed appointment of a 12-member commission by the Dominion government in consultation with the leader of the opposition and representatives of smaller groups. Three members, he said, should represent the National government and nine the provinces.

The commissioners, he said, "should not be active members of any political parties, but should include men or women sympathetic toward or generally representative of the broad principles of the three political groups."

Mr. Spry said all political parties should be given use of the national network without charge at various times during the year, and that during election campaigns, national, provincial or local, they should be offered similar free time, having the option to buy additional time if they wished.

Investigate Relief

Hepburn To Visit Ontario Municipalities For This Purpose

Toronto.—Within two weeks Premier Mitchell F. Hepburn will visit various Ontario municipalities and personally investigate conditions of homes of relief recipients, he announced after 15 Ontario hunger marchers had conferred with him and cabinet members for nearly three and one-half hours.

Beyond this announcement and the statement he would hold another conference with the marchers, Mr. Hepburn made no further comment on the lengthy interview.

To Accept Memento

Women Of Canada To Present Gift To Countess Of Bessborough

Ottawa.—Women of Canada will be given an opportunity to take part in presenting a farewell gift to the Countess of Bessborough. At a meeting held here, over which Lady Percy, wife of Sir George Percy, presided, it was announced that Lady Bessborough had consented to accept a memento of the happy years she has spent in Canada. A movement to present such a gift was launched at the meeting.

Muskat Ranches

Winnipeg.—Division of 11,000 square miles of marsh land in the Saskatchewan river delta east of The Pas into areas suitable for muskrat ranches was ordered by Manitoba Natural Resources Minister J. E. McDermid. Lands will be available for leasing by autumn.

REFORMS MUST BE MADE IN A LEGAL MANNER

Ottawa.—The government has gone to the extreme limits of parliamentary power to reduce the wrongs uncovered by the mass buying commission, Premier R. B. Bennett declared in the House of Commons.

The prime minister was replying to attacks on the government's mass buying legislation by Hon. H. H. Stevens, former cabinet minister, who dubbed it "stupid, ill-considered and ineffective."

"My own view," Mr. Bennett said, "is the constitution of this country must be changed." But it could not be accomplished in a day nor by parliament overstepping its legal bonds, the prime minister warned, turning and facing his former cabinet colleague, "have been led to believe this parliament can pass any sort of legislation it likes, the age of lawlessness is on us. Let there be no mistaking that."

If reform is to take precedence over revolution, Mr. Bennett said, changes must be made legally. "It can not be right to induce the people to believe parliament has the power but will not exercise it through expediency or fear."

It was the first time the two Conservatives, who once sat chair-to-chair around the council table, have clashed in the house since Mr. Stevens' resignation.

Amid applause from all over the chamber, Mr. Bennett repeated his assertion Canada would never become a "wrecker" on its obligations. It would be the ruin of the country if the public credit was shattered and this referred to public and provincial debts as well as dominion.

The former trade minister appeared nervous and halting when he started his speech, but warmed up as he proceeded. He claimed he remained a Conservative, and, because he believed insufficient attention had been paid to the dominance of credit reserves and industrial monopolies, he would appeal to his fellow-Conservatives in the house.

"I stand by what I then said," said Mr. Bennett, referring to his radio speeches. "The legislation we have submitted to the house, subject to what I shall say later, does implement in so far as the powers of this parliament extend, the report of the price spreads commission."

"My view is," Mr. Bennett said, "the constitution of this country must be changed." But it was a result of compromise and could not be changed in a day. There were many considerations that must be borne in mind.

Attempts had been made in the past, by his government and the King administration, Mr. Bennett said, to obtain agreement among the provinces to constitutional changes, but no tangible results were reached.

It was futile, Mr. Bennett proceeded, for any member to argue that parliament could name anything a crime under the criminal code, because the courts had ruled otherwise. "Whether we liked it or not we must consider that point."

"To the limit of the power of parliament," the prime minister said, "we have invited parliament to give redress within our competence."

Trotsky Again Disappears

Entire Party Drops Out Of Sight In Norway

Oslø, Norway.—Leon Trotsky, famed Russian exile, staged another mysterious disappearance here, dropping out of sight shortly after he arrived from Antwerp.

Trotsky, his wife and two secretaries went from Oslo to Hønefoss, town of 3,000 population, where they were expected to spend six months. The entire party disappeared, however, and efforts to locate it were unavailing.

London.—The Daily Herald said Leon Trotsky, Russian exile who entered Norway is "hidden with advanced tuberculosis," and his journey to the north was "a matter of life and death."

O, Land Beloved!

O Land Beloved, to whom our fathers came
Long years ago, to build our heritage,
On history's scrolls, to blazon forth thy name,
And leave for us a white, unsullied page.
They did so much ere their short day was done
And they passed on to sunset of their years,
Tho oft the glories that for thee they won
Were bathed, alas, in blood and bitter tears.

Yea, they did much, and dwelling on the past
Reminds us that they left us more to do;
The future moves toward us, oh! so fast,
And there's a trail untrodden we must hew.
Lo! we must make it lead to heart's content,
Untouched by hatred and unwashed by blood,
That whosoever will may pitch his tent,
And find along the way true brotherhood.

No man shall then bewail an unreachd goal,
Nor fear each day the struggle to begin;
The might of Mammon shall not crush his soul,
His brother shall help him fight and win.
Tho weary when the sun shall fade away,
He shall not weep to see it on the wane.
O, Land Beloved! he'll know that every day
At sunrise will his hopes be born again!

STONY PLAIN SUN.

Published Every Thursday at The Sun Office, Stony Plain.

Thursday, June 27, 1935.

THE NEWS OF STONY PLAIN AND DISTRICT.

Reeve Howat and Secretary Best were Stony Plain Saturday on business in connection with Inga M.D.

Ken Smith, Onoway, was a week-end visitor here.

Mr Moyer resumed his duties at the Public school on Tuesday, after a short absence due to illness.

Jerry the Busman is running his bus thru here on Sundays at regular schedule time.

The date of the Rifle Club dance has not yet been set but will probably be held before the shooters leave for Calgary.

Good progress is being made on the new garage on Main st. for Barth & Anderson.

Muir Lake Community held a dance last Friday night in their hall. They are intending to hold a dance on Monday Evg., but the residents of the district are intending to come to the Sports meet at Stony on the First.

BUTTER AND EGGS WANTED at The Royal Cafe.

Brightbank News.

Seeding is nearing completion in this district and at Hansen's Corners. Rainy weather has delayed spring work somewhat, and the land is very wet. A Hansen's Corner farmer is said to be thinking of putting a pair of ears on his gang plow.

John Summerfield has returned from the Royal Alex. Hospital, and has made such good improvement that he forgets to limp at times.

While our Councillor was inspecting roads in Mewasin district recently a Russian rolled his empty kraut barrel out of his house down hill which rolled right against the Councillor. It took quite a shove and a swing of five fingers in the kraut barrel's opening to start it rolling up hill again.

Mr Herbert Sterling has gone to Jasper Park Lodge, to resume his duties as policeman.

The Misses Julie and Aetty Fryer were Sunday visitors with Miss Grace Summerfield.

Mr Gordon McDonald was a Sunday visitor at the home of Mr and Mrs Jotkan and family.

The Social Credit study group of Lucknow district are having their meetings regularly Saturday nights with Pres. J Kyle in the chair.

Funeral of Mrs. Enders.

The funeral of Mrs. Katherine Enders, who passed away June 17, was held on Thursday to St John Lutheran Church, Blueberry. Rev Emil Eberhart officiated. Interment was made in the family plot in the shurhyard.

Mrs. Schonke Passes.

Mrs Minnie Schonke of Carval, formerly of Keop Hills, died in an Edmonton hospital, on Thursday, June 26. The funeral took place at Keop Hills on Saturday at 2 p.m., Rev E Eberhart officiating.

She leaves to mourn her loss 1 boy John, 17 years of age, and 1 girl Nora 18 years old.

SPORTING NOTES OF LOCAL INTEREST

Two years ago we had our last look at a Sr. baseball club in this town. It was playing in the Big Five League, composed of 8 Edmonton teams and Morinville. You all know how we fared, but do you remember the 1 game we beat Red Sox here 12-7? Our line up was—Brass, P Enders, Graden, H Landsman, Loblich Bros., Zucht, H Wolf, Sinner, Lory, Larson, E Enders. You all enjoyed that game because it was well played. McCulla was at the head of that team, but he left alone wito several other players soon after, due to internal trouble, and the fans soon saw the breakup. We are not blaming anybody; the past is over, and we must look to the future now. Do you want to see another good Sr. team playing under a Stony banner? You'll never have a better chance than now, to see this happen.

Why do we say that? Well, for the past few years we have only seen 2nd rate ball as played by a group of players sponsored by W.L. It is not the backer's fault that the team is poor. They have not the players to choose from, and a good team needs the whole town's backing, not just a few

One of the Onoway team fanning the air for a no-run score.

Last year our sports day netted a fine surplus. There is no reason why history can't repeat, if the day is good. Now, if by the end of the day, they have \$206 what are they going to do with it? Why not spend some for the benefit of the town and immediately reorganize the ball club and give it a chance. True, we could not expect the whole sum, but if a hundred was set aside to guarantee next year's 1st of July's sports day there would still be ample to form a good club; \$75.00 will give the boys a flood send off and with men who are not ball players to handle the club (coaches and managers) and with the best ball players in the district a good team would be sure of good support. Think it over, and it is up to all, as unless untold front is shown you can be sure the heads of the sports day will do nothing.

Notes of Sports.

Well, no rain can stop the First, as it will be past by then. On Monday the committee made the draws for baseball, as follows:
10 o'clock—Onoway v W-League
12—Spruce Grove v Centrals
2—Brightbank v Hansen's
4—Winter 10 v Winter 2

Basketball schedule:
11 o'clock—Centrals v Stony Plain
1—Brightbank v Comet
3—W-League v Winners 11

Ad official baseball umpire has been

Ye Editor on the way to Monday Night's Committee Meeting.

picked to take charge of all ball games. Rev Mr Raduenz, and he comes well recommended.

In the football league Beahawks kept 1st place by defeating Pelicans 25-17.

In baseball the locals pulled a big surprise by defeating Onoway last Sunday by 11-0.

Enders pitched 5 hit ball for the winners, and if he can repeat this performance on the First, he will put the strong Onoway boys, who have promised a bolstered line-up for that day, on the spot.

This was the first real ball game we have seen the locals play for some time. Here's hoping it will not be just a flash in the pan.

SLOT MACHINES TO BE ILLEGAL.

Under the new Act passed at the last session of the legislature brings to an end on Monday next, July 1st, the long and profitable career of the devices commonly known as slot machines. On and after Monday any Police Officer has the right to seize without warrant any machine he finds on any public premises; and on warrant he may search private premises where he believes such machines are kept.

Pin ball machines, baseball, golf and whiffle machines and any others capable of being used for gambling purposes come within the definition of "slot machines."

Officers for Sports Day.

"The Unknown Port," Etc.

CHAPTER VI.—Continued

"Sensible man! At this education business is stuff and nonsense unless it fits a boy to earn his living, which nine times out of ten it doesn't do. Look at Matthew Adam. His people scrippled and saved to send him to college. I don't say he got nothing out of it; but here he is back in Pine Ridge running a dairy ranch! Tell me, child, has your father really lost his money?"

"Most of it, I'm afraid. We're renting the city house and the family will live at Edgemore for the present."

"Where's Edgemore?"
"About twenty-five miles from town. It's Mother's old home, but Aunt Judy owns it. She won't let Dad pay a cent of rent."

"Who's Aunt Judy?"
"I forgot you didn't know all about us," replied the girl. "Aunt Judy is mother's younger sister. She lived with us for years, and took care of us children when we were little."

"And Louise, your father's sister, lives with you too?"

"Yes. She teaches in a very high-hat girls' school."

"High-hat," echoed Cousin Columbine, plainly mystified.

Nancy laughed, and explained: "That's only slang. Perhaps it's an Eastern variety that hasn't reached Pine Ridge. It means smart. Cousin Columbine—awfully stylish, you know. Aunt Louise is clever. She's earned a good salary for years."

"Well, we live to learn," admitted the old lady briskly. "High-hat! It's really expressive when you come to analyze it. So you're three families under the same roof. I should think you'd fight like cats and dogs."

The girl laughed again.

"We don't, honestly; though Aunt Louise thinks Aunt Judy spoils us, and sometimes they scrap about it—that is, as much as any one can scrap with Aunt Judy."

WEAK WOMEN

ARE you tired, nervous, run-down? No pep? No ambition? Take Lydia E. Pinkham's Vegetable Compound. It quiets quivering nerves—improves the appetite—makes life seem worth living again.

Mrs. James Martin of 227 1/2 Main Street E., Hamilton, Ontario, says: "My Vegetable Compound built me up wonderfully. I have gained pep, my nerves are better and I have a good appetite. I feel much stronger."

Try Lydia E. Pinkham's

VEGETABLE COMPOUND

"It's plain to see which is the favorite aunt, my dear!"

"But you mustn't think we don't appreciate Aunt Louise," spoke up Nancy quickly. "She's a dear; but Aunt Judy understands us better and takes our side. If Aunt Louise had had her way we'd never in this world have seen Pike's Peak!"

Her eyes crept upward to the snow-capped mountain, and the old lady asked: "Was it worth the journey?"

"It's wonderful. From the train it was the least bit disappointing, perhaps because we were so far away; but here it's marvelous—and so near!"

"That's only the atmosphere. Will you believe it, tourists here in Colorado Springs have been known to start out before breakfast thinking they could walk to the base and get back in an hour! Everything looks nearer than it is—even the stars. But I like the Peak better from our side, my dear, and I think you will. Where are those boys. They're certainly taking their time. So your Aunt Louise opposed your coming? Will you explain why?"

Nancy colored a little, something which did not escape the shrewd old eyes.

"She—well, she said Jack was too impressionable. I guess she thought work on a ranch—going round all day with rough men and boys would—would spoil his manners."

Cousin Columbine stiffened.

"Did she indeed? And what about yourself?"

"These frank cross-questions were disconcerting; but the girl said honestly: 'She thought I'd be homesick, and I dare say she's right; but as Mother pointed out, things wouldn't be very thrilling at Edgemore. You see, I've always spent winters in the city; and this year—'"

"Well!" prodded the old lady, as she paused.

"I only mean," Nancy hesitated, thinking it might sound foolish to an inhabitant of Pine Ridge, Colorado, "that if Dad hadn't lost his money I'd have made my debut this winter."

"Well, his losses were severe, you must say that, anyway," was the brusque reply. "Here come the boys at last. Mark Adam, did you can those peaches yourself? You've been gone long enough."

"Not only canned, but picked 'em," he retorted. "Why didn't you let Matt cart this stuff, Miss Columbine? I'll have to tie it on the running board."

"You'd do no such thing! Put it right in here and I'll set my feet on it. There! I'm comfortable as can be. Truth is, I intended asking Matthew to give this box, but it slipped my mind when I saw he was in such a hurry to get away from us. Did you boys have a soda at the drug store? You must have been somewhere this twenty minutes!"

"It was only polite for me to give your company a treat, Miss Columbine," explained Mark as he started the engine. "What next? Do we head for home?"

"At once; and don't attempt to leave everybody else behind, even if you are the best driver in Pine Ridge. I understand you told Juanita Tubbs that you could drive up Ute Pass with one hand and blindfolded into the bargain. I was surprised, Mark Adam, to find you'd added boasting to your other sins."

Mark laughed and answered: "You know me better, Miss Columbine. That was only for Juanita's benefit. Since her cousin from Denver won the motorcycle race up the Peak last fall, that girl has put on airs."

"She'll be putting on black most likely, if he attempts to win another year," sniffed Miss Columbine. "Such races ought to be prohibited by law. We're headed right into the mountains now, Nancy. This part of town was settled before the Springs, and the Territorial Legislature met here in 1865 with nothing but a log room for their House of Representatives."

"Was there any hotel for the men to stay at?" questioned Jack, for whom the details of United States history held a lure.

"Only a tavern made of logs, not nearly big enough to accommodate them. Some had to sleep on the floor of the assembly room; and one member brought his family and set up housekeeping in a tent."

"But surely you don't remember

LINIMENT

those days, Cousin Columbine," said Nancy.

"Well, hardly!" chuckled the old lady. "But many's the time I've heard my father tell about it. One day he came down to get a look at the great men, and found a Chief Justice squinting before the fireplace frying bacon!"

"How'd they get here if they came from a distance?" put in Jack. "On horseback?"

"Most of them; but they came in wagons too, or in old-fashioned overland stage coaches drawn by mules. One member tramped over a hundred miles through the mountains, and arrived with a boot on one foot, a brogan on the other, and wearing an old slouch hat he'd stiped in with the brim half gone."

"What was he supposed to represent?" Mark Adam asked over his shoulder. "A rummage sale?"

"It doesn't matter," replied Miss Columbine briskly, "because he was elected speaker of the House; and those who heard that speech never forgot it. A fine orator was George Crocker; and he came from Massachusetts, I believe. There was something thrilling about the struggle of those old days which you young folks'll never realize. See those tall red cliffs over to the right, Jack? That's the entrance to the Garden of the Gods."

In his excitement the boy would have stood up for a better view, but Nancy's bag across his knees prevented him.

"I remember my father bringing me down on horseback when I was a tiny girl," said Cousin Columbine. "I sat astride in front of him and we rode all through the Garden looking for cattle. It was vacant land then, and Father was so impressed with the rock formation that he considered pre-empting it, and then gave up the idea, thinking the land worthless."

"Imagine owning the Garden of the Gods!" gasped Jack. "Has it always gone by that name, I wonder?"

"It has as long as I remember; but the early settlers called the place Red Rocks. No need to encourage a stiff neck, Jack, by trying to see out of the back of your head. We'll drive down some day and explore the Garden."

If the West had seemed wonderful from a car window, it was thrice wonderful from Mark Adam's dilapidated Ford. The young Nelsons were never to forget that ride. As they wound up the old Indian pass (a good road now, though narrow enough in spots to cause a shiver to run down Nancy's eastern-bred spine), it would have been impossible to express just what they felt. Such spectacular beauty was new to both of them. Glimpses of rushing water far below—the rocky cliffs and hillsides far above—sharp curves appearing with alarming frequency; and over everything a sky a deep,

deep azure such as they had not imagined, was, as Nancy wrote the family later, too wonderful for any words of hers.

"There!" exclaimed Cousin Columbine when those impressive cliffs were left behind, "that's over safely. There was when that pass was really dangerous. It's a boulevard now compared with those days. Thanks for blowing the horn so often, Mark. I know you did it for my benefit, though my worst enemy never called me nervous. There's Matthew drawn up beside the truck. Do you suppose he's had a breakdown? That truck of yours is getting pretty ancient."

"There's plenty of life in that old truck yet," defended Mark. "All my bashful brother wants, most likely, is for us to get home first so he won't have to describe these—er—newcomers to Aurora Tubbs. Matt says Aurora takes away his power of speech when she slings questions at him. He says it's no wonder Victoria Tubbs went into a decline. Hi, there, Matt! Want us to tow you home?"

The older Adam smiled a negative as they passed; and Nancy said: "Doesn't your brother ever wear a hat?"

"Not as you'd notice it. Dad says that's all Matt learned in college—going bare-headed."

Mark turned to throw a smile at Nancy and barely escaped colliding with a rock.

"Mind your driving," ordered Miss Columbine.

"Yes, ma'am," replied the youth with meekness; and turned his head again, this time to wink.

The winter's day had seemed almost balmy to the New Englanders; but as they reached more open country and the shadows of afternoon began to deepen, Nancy was uncomfortably conscious of the changed atmosphere and lack of lap robe. She it was a relief when Cousin Columbine announced that they were nearly home.

"Stop after you cross the track, Mark, and let them get a good look at the Peak from this side—our side, I call it. You see, I've lived in the shadow of that mountain since the day I was born, and it seems to belong to me."

Mark nodded, crossed the track, turned sharp to the left and stopped the car, while Nancy uttered a cry of genuine delight. Cousin Columbine had not exaggerated. Pike's Peak was beautiful from here, its snowy crest lifting above a forest of dark pines. Said Jack, after an awed moment: "That's great, isn't it?" And the old lady responded: "I'm glad to see that you appreciate nature, for it's all I have to offer except hospitality. This is Pine Ridge, my dears. I dare say it looks provincial to you; but it's home to me!"

Home! Nancy's eyes strayed from the mountain, and with difficulty she suppressed another exclamation—one of dismay. Pine Ridge! Why it was nothing but a straggling, dusty street! Had they travelled two thousand miles in order to spend weeks, months, goodness knows how long, in such a spot? The grandeur of the mountain was forgotten in that desperate moment. All the girl saw was a row of forlorn frame buildings, their elusive fronts rising deceptively to the height of an imaginary second story, their clapboards bare of paint, their porches sagging. . . .

Little Helps For This Week

If thou has run with the footmen and they have wearied thee, then how canst thou contend with horses? And if in the land of peace wherein thou trustest they wearied thee, then how wilt thou do in the swelling of Jordan? Jeremiah 12:5.

How couldst thou hang upon the cross, To whom a weary hour is loss. Or how the scorn and scourging brook Who shrinkest from a scornful look?

A heart unloving among kindred has no love towards God's saints. If you have a cold heart towards a servant or a friend, why should you wonder if you have no favor to rewards God. If we are cold in our private prayers we should be earthly and dull in the most devoted religious order; if we cannot bear the vexations of a comrade how should we bear the contradictions of sinners, and if a little pain overcomes us how could we endure a cross? If we have no tender cheerful affectionate thought and love for those with whom our daily hours are spent, how should we feel the ardor of love to the unknown and evil, the ungrateful and repulsive?—H. E. Manning.

Stamp Collector Was Lucky

Found Priceless Stamp in Lot He Bought For Small Sum

A rarity of philately—the one penny Shakespeare charity stamp issued in Great Britain—was discovered by Charles A. Davis of Dorchester, Mass., while looking through a large collection of 19th century stamps he purchased 10 years ago for a "song."

The stamp, bearing a likeness of the Bard of Avon, clean and undamaged, is virtually priceless. It is the only known copy in America, and one of few throughout the world. It was among the British local stamps, issued by the National Carriers Co. some time between 1873 and 1875. These stamps were used by private concerns which carried mail and packages in competition with government mails, and come under the heading of "local" stamps. These stamps were part of a large stock which Davis bought for \$25.

Monday Next Is The Stony Plain Big Sports Day.

The Preparations which Are Being Made Show the Coming Celebration will Surpass Anything Heretofore Attempted Here.

By Saturday night the last finishing touches will have been given to the preparations for the Dominion Day celebration here.

The various committees have been working industriously on their respective programs, and we may rest assured everything possible has been done to guarantee a very enjoyable time for all who attend.

The Sports Committee, under Chairman Oatway, have evolved a fine program, consisting of 21 stated events to be run; and have a reserve fund for the prizes to be awarded the winners of special events; these specials to be run as called for. The members of this committee expect to have a busy time; and if all the events are run off, this will prove to be true.

Mr. Christie, Foreman of the Entertainment Committee which gives first aid to the hungry, has a phalanx of bun-pushers ready for work.

The day's proceedings promise to get off to an early start, as the first game in the baseball tourney begins at 10 a.m.; and, if last year's custom is followed, there'll be a lot of spectators at the early morning game, as in 1934 farmers and their families began converging on the Fair Grounds about the hour the town folk were breaking fast.

Following is the corrected list of events, which, as stated, may be added to—

- 1—400-yard dash, boys 15 and under, 75c, 50c
- 2—100-yd. dash, girls 15 and under, 75c, 50c.
- 3—8-legged race, girls 12 and under, \$1, 50c.
- 4—8-legged race, boys 10 and under, \$1, 50c.
- 5—Half mile race, men's open, \$5, \$2, \$1
- 6—Half mile bicycle race, open, \$2, \$1
- 7—100-yd. dash, men, open, \$2, \$1, 50c.
- 8—100-yd. dash, ladies' open, \$1, 50c, 25c
- 9—Boys' egg and spoon race, 12 years and under, 50c, 25c.
- 10—Girls' egg and spoon race, open, 75c, 50c
- 11—Half mile relay race, men's open, \$4, \$2
- 12—Wheelbarrow race, boys 10 and under, \$1, 50c
- 13—Wheelbarrow race, girls 10 and under, \$1, 50c
- 14—1 Mile race, men's open, \$4, \$2
- 15—Slow car race, \$5, \$2
- 16—Horseshoe competition
- 17—Tug-o-war, men, \$5
- 18—Tug-o-war, ladies, \$4
- 19—Baseball prizes, \$50, \$12, \$5
- 20—Basketball Senior, \$10
- 21—Basketball Junior, \$5
